PROFILE

As a junior web developer, I am driven by my passion for creating immersive digital experiences and solving complex problems through innovative technology. With a solid foundation in HTML, CSS, and JavaScript, I am eager to contribute my skills to dynamic projects and collaborate with talented teams to bring visions to life. I thrive in fast-paced environments where I can continuously learn and grow, leveraging emerging technologies to enhance user engagement and streamline processes. My enthusiasm for coding extends beyond the screen, as I am dedicated to understanding the needs of end-users and delivering solutions that exceed expectations.

ACADEMIC PROJECTS

Personal Portfolio Website

- Developed a personal portfolio website using HTML, CSS, and JavaScript.
- Implemented responsive design techniques for optimal viewing across devices.
- Incorporated CSS animations to enhance user interaction.

To-Do List Application

- Created a to-do list application using java script.
- Implemented features such as adding, editing, and deleting tasks.
- Used local storage to persist user data between sessions.

Responsive Agency Website

- Ensuring the website layout adjusts seamlessly across various screen sizes and devices.
- A menu bar providing links to different sections of the site, typically located at the top of the webpage.
- Strategically placed buttons throughout the website to prompt visitors to take specific actions, such as "Contact Us," "Subscribe Now," or "Learn More."
